### Pieter Engelbrecht, Chief Executive Officer:

The Shoprite Group's results for the six-month period under review reflect the business's incredible dedication to our customers whose support of our operations, both in-store and online via our digital Checkers Sixty60 app has resulted in us extending our period of uninterrupted market share gains in our core South African supermarket business to 58 months. The 14.6% increase in sales from our core business segment equates to R12.4 billion in additional customer spend with us on the same period last year. Despite reporting against an exceptionally high base of sales growth of 17.5% for the same period last year, the 14.6% increase in sales for this interim period compares admirably to the rest-of-market growth in South Africa, per NielsenIQ, for the same period of 7.6%.

Checkers and Checkers Hyper's 13.7% sales increase is a result of unwavering execution of the brand's clear value proposition, continued store upgrades and advances in the areas of fresh, private label and on-demand execution by Checkers Sixty60, which, notwithstanding a base of considerable growth built up over a number of years, increased sales by a further 63.1% over the six months.

Shoprite and Usave increased sales by 13.1%. Shoprite, with the inclusion of 51 stores acquired from Massmart Holdings Ltd ("Massmart"), increased sales by 13.2% whilst Usave, our limited assortment discounter, increased sales by 12.3%. This customer's challenges and needs remain front and centre in our business, resulting in a steadfast commitment to lowest prices, in-stock availability, efficient operations and ongoing product and store development.

Whilst the operating context in South Africa remains challenging and costly, especially taking into consideration the ongoing cost of diesel generators during load-shedding, we are most pleased to report an increase in profits and dividends for the period.

The Group continues to invest in the business on a number of fronts: tech and digital, supply chain, stores and of course, people. Over the six months we added a net of 197 new stores to total 3 543 stores and as a Group our commitment to employment growth resulted in the creation of 2 617 new jobs. In addition, our Shoprite Employee Trust expensed R122 million in employee distributions to eligible employees in South Africa with equivalent awards granted by subsidiaries in countries outside South Africa.

The well-known African proverb 'it takes a village' is no understatement at Shoprite today as we strive to meaningfully improve the lives of millions of people on a daily basis. My sincere thanks to Team Shoprite, our base of close to 161 000 employees; the Group's customer base who number 29 million in South Africa alone and our many stakeholders including our valued suppliers and SMME partners. As a Group we are authentically purpose led in all that we do and I am incredibly proud of how our collective efforts are increasingly borne out not just in our results but in the difference we make to the lives of our people and customers every day.

# Results commentary for the 26 weeks ended 31 December 2023

## Introduction

The results referred to in this commentary pertain to the Group's continuing operations after the adoption of IFRS 17: Insurance Contracts (IFRS 17), which replaces IFRS 4: Insurance Contracts. Prior year comparative figures, where applicable, have been restated for the adoption of IFRS 17.

The Group has delivered strong financial results, increasing sales by 13.9% to R121.1 billion. This was a well-rounded result, underpinned by our core Supermarkets RSA segment, to which all supermarket brands contributed significantly.

The Group's 23.6% reported gross margin is marginally higher year-on-year (H1 2023: 23.5%) owing to supply chain efficiencies allowing for increased volumes through our distribution centres as well as the respite in fuel prices over the six months.

Trading profit increased by 10.7% resulting in a trading margin of 5.5% (restated H1 2023: 5.7%). Reported trading profit continues to be notably impacted by the R500 million diesel expense to power generators in our South African operations.

The Group's earnings before interest, income tax, depreciation and amortisation (EBITDA) increased by 10.3% and measured R10.2 billion.

During the period the Group opened 215 stores expanding its continuing operations footprint to 3 543 stores. Total operations capital expenditure to continuing operations' sales for the period measured 3.1%.

The Group's cash generative capability is reflected in its cash generated from operations in the amount of R12.4 billion for the period.

The Board has declared an interim dividend of 267 cents per share, representing year-on-year dividend per share growth of 7.7%.

The Group did not repurchase any shares under the authorised share buy-back programme during the period under review. Since the inception of the Group's share buy-back programme in our 2021 financial year we have repurchased 8.4 million shares to the value of R1.5 billion. This equates to an average purchase price of R179.32 per share.

The increase in inventory is as a result of a number of factors, including:

- › Support of the business and its elevated level of sales growth especially with regard to Checkers Sixty60 which utilises our in-store inventories.
- › Expanded store footprint with the opening of 315 corporate stores over the last 12 months.
- › Maintaining our required levels of safety stock given that inbound service levels remain less than optimal and, from time to time, face external disruption.
- › Increased general merchandise stockholding in response to global supply chain constraints.
- › Increased inventory holding in distribution centres owing to expansion in supply chain network.

Refer to note 1 of the condensed consolidated interim financial statements for the basis of preparation of the Group's Ghanaian operations in accordance with IAS 29.

The Angolan economy had been considered to be hyperinflationary up to 30 June 2019. As a result, the Group accounted for the results of its Angola operations on a hyperinflationary basis in accordance with IAS 29 up to 30 June 2019. The Angolan economy was assessed not to be hyperinflationary for the current and comparative reporting periods. Although no further hyperinflationary adjustments were required for the current and comparative reporting periods, the statement of financial position at the respective reporting dates still includes cumulative hyperinflation adjustments as a result of the application of IAS 29 up to 30 June 2019. These cumulative hyperinflation adjustments, included in property, plant and equipment and right-of-use assets, are written off to the statement of comprehensive income, together with the related deferred income tax effect, in accordance with the Group's accounting policies for the respective items.

It is therefore useful and good governance to report pro forma financial information for the current and previous period under review which excludes the impact of hyperinflation.

The pro forma financial information was calculated through applying all the accounting policies adopted by the Group in the latest audited annual financial statements, except for the hyperinflationary standard IAS 29. The adjustments made in respect of hyperinflation were extracted from the accounting records used in the preparation of the condensed consolidated interim financial statements. In calculating the pro forma headline earnings, the impact of the pro forma adjustments to items of a capital nature, net of income tax, was excluded from the pro forma basic earnings per share.

## Pro forma financial information continued

**Adjusted headline earnings per share (adjusted HEPS) and adjusted diluted headline earnings per share (adjusted DHEPS)**

The Group's reported results include the Shoprite Employee Trust distributions and provisions for eligible employees in South Africa as well as an equivalent award granted to qualifying employees of subsidiaries in countries outside of South Africa. The distributions are additional incentives to reward employees for staying in service of the Group. The Group's reported results also include exchange rate differences which fluctuate from year to year. Although the Group manages its exposure to foreign currency fluctuations, economic factors outside of the Group's control have a significant impact on currency devaluations in countries where the Group operates. As already stated, the economy of Ghana was assessed to be hyperinflationary in the current reporting period. Furthermore, the reported results include cumulative hyperinflation adjustments for Angola in property, plant and equipment and right-of-use assets, resulting from the application of IAS 29. Although the Angolan economy was assessed to be no longer hyperinflationary for the current and comparative reporting periods these results still include the impact of unwinding aforementioned cumulative hyperinflation adjustments. Lastly, the calculation of reported HEPS includes profit on lease modifications and terminations, while the impact of right-of-use asset impairments is excluded.

Adjusted HEPS and adjusted DHEPS are calculated by adjusting HEPS and DHEPS with the impact of the Shoprite Employee Trust distributions to eligible employees in South Africa and equivalent awards granted by subsidiaries in countries outside South Africa, exchange rate differences, hyperinflation adjustments, lease modifications and terminations as well as the related tax effects. In order to calculate the per share values, the adjusted headline earnings and adjusted diluted headline earnings are divided by the weighted average number of shares and the weighted average number of shares adjusted for dilution, respectively. Management believes adjusted HEPS and adjusted DHEPS as noted below, are more useful measures of the Group's underlying performance. However, this is not a defined term under IFRS and may not be comparable with similarly titled measures reported by other companies. The Group has therefore presented its HEPS and DHEPS for the current and comparative period on a similar basis, excluding the impact of the Shoprite Employee Trust distributions to eligible employees in South Africa and equivalent awards granted by subsidiaries in countries outside South Africa, foreign exchange rate differences, hyperinflation accounting and lease modifications and terminations as well as the related income tax, to facilitate comparisons against the comparative period's results.

The table below presents the adjustments to the items reported.

\*\* The impact of exchange rate differences, including discontinued operations, consists of R108 million exchange rate losses (1 Jan '23: R22 million gains) as reported and R81 million (1 Jan '23: R2 million) exchange rate losses from discontinued operations (refer to note 6 of the condensed consolidated interim financial statements).

\*\*\* The impact of the hyperinflation adjustment resulted in an increase of R11 million (1 Jan '23: R26 million) in headline earnings which is calculated by excluding the R2 million impact (1 Jan '23: no impact) of the items of a capital nature hyperinflation adjustment from the profit before income tax hyperinflation adjustment of R9 million (1 Jan '23: R26 million).

\*\*\*\* The tax effect of exchange rate differences as well as lease modifications and terminations was calculated by applying the average effective tax rate of 30.8% (1 Jan '23: 31.1%). The tax effect of hyperinflation adjustments and the Shoprite Employee Trust distributions to eligible employees in South Africa and equivalent awards granted by subsidiaries in countries outside South Africa was based on the actual tax charges.

# Selected explanatory notes to the condensed consolidated interim results

## 1 Basis of preparation

The condensed consolidated interim financial statements are prepared in accordance with International Financial Reporting Standard, IAS 34: Interim Financial Reporting, the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council and the requirements of the Companies Act of South Africa.

The accounting policies applied in the preparation of these condensed consolidated interim financial statements are in terms of International Financial Reporting Standards and are consistent with those applied in the preparation of the previous consolidated annual financial statements, except where the Group has applied new accounting policies or adopted new standards effective for year-ends starting on or after 1 January 2023.

The Group has adopted IFRS 17: Insurance Contracts (IFRS 17) on 3 July 2023. The impact of the adoption of this standard is disclosed in note 2.

During the reporting period, the Group classified the economy of Ghana as hyperinflationary, effective from 3 July 2023. Accordingly, the results and the financial position, including comparative amounts, of the Group's Ghana subsidiary have been expressed in terms of the measuring unit current at the reporting date, as required by IAS 29: Financial Reporting in Hyperinflationary Economies. The carrying amounts of non-monetary assets and liabilities are adjusted to reflect the change in the general price index from the date of acquisition to the end of the reporting period. Gains or losses on the net monetary position are recognised in profit or loss. All items recognised in the statement of comprehensive income are restated by applying the change in the general price index from the dates when the items of income and expenses were initially earned or incurred while all items in the statement of cash flows are expressed in terms of the general price index at the end of the reporting period. At the beginning of the first period of application, the components of owners' equity, except retained earnings, are restated by applying a general price index from the dates the components were contributed or otherwise arose. These restatements are recognised in other comprehensive income. Restated retained earnings at the beginning of the first period of application are derived from all other amounts in the restated statement of financial position. As the presentation currency of the Group is that of a non-hyperinflationary economy, comparative amounts of the Group are not adjusted for changes in the price level or exchange rates in the current year.

Various other revised accounting standards became effective during the period, but their implementation had no significant impact on the results of either the current or the previous periods. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

The preparation of these results has been supervised by the Chief Financial Officer, Mr A de Bruyn, CA(SA). There have been no material changes in the affairs or financial position of the Group and its subsidiaries from 31 December 2023 to the date of this report. The information contained in the interim report has neither been audited nor reviewed by the Group's external auditors.

## 2 Change in accounting policy

### 2.1 Adoption of IFRS 17

IFRS 17 is effective for the accounting period commencing 3 July 2023 and replaces IFRS 4: Insurance Contracts. The Group implemented the standard using the full retrospective approach. Accordingly, the comparative information in these unaudited interim condensed consolidated financial statements have been restated from a transition date of 4 July 2022. The adoption of IFRS 17 applying the premium allocation approach resulted in two new line items on the statement of comprehensive income namely insurance revenue and insurance service expense. The adjustments recognised for each individual line item affected in the Group's interim condensed consolidated statement of comprehensive income, statement of financial position and the statement of cash flows for the periods are detailed below.

The Group's first-party cell captive arrangements continue to be accounted for under IFRS 9: Financial Instruments.

Sale and leaseback transactions:

Sale and leaseback transactions relating to the Group's property, plant and equipment may become more prevalent as and when the opportunity arises. The Group secured long-term financing during the reporting period by entering into a sale and leaseback transaction on one of its malls (2 Jul '23: two of its distribution centres), namely the Sun Valley Mall (2 Jul '23: Canelands and Wells Estate distribution centres) to Heriot REIT Ltd (2 Jul '23: Retail Logistics Fund (RF) (Pty) Ltd). The sale of the Sun Valley Mall (2 Jul '23: Canelands and Wells Estate distribution centres) generated cash inflows of R304 million (2 Jul '23: R716 million and R166 million) as well as a profit of R51 million (2 Jul '23: R51 million per distribution centre).

The impact of the Group's sale and leaseback transactions as well as its key terms and conditions are disclosed below:

Cash proceeds received	304	—	882
Carrying amount at disposal date	(219)	—	(684)
Right-of-use asset recognised	87	—	357
Lease liabilities recognised	(121)	—	(453)
Profit on sale and leaseback transactions	51	—	102
Interest rate implicit to the lease	9.6% – 10.4%	—	13.7% – 14.2%
Average lease term (years)	5 to 12	—	20

The age and the minimum estimated useful life of the mall (2 Jul '23: distribution centres) were used to determine a fair lease period and rental based on market values.

Payments not included in the measurement of the lease liabilities relating to the mall (2 Jul '23: distribution centres) include any operational costs, security and insurance costs, administration and maintenance costs, rates and taxes and any other municipal costs for water, electricity, sewerage and refuse. Only the rental portion, directly related to the market value of the properties, is included in the measurement of the lease liabilities. Normal maintenance charges are also not included to ensure that only the rental portion, directly related to the cost price, is included in the measurement of the lease liabilities.
